

# FOSROC® NITOPROOF 910

## High performance, UV resistant polyurethane waterproofing membrane

Nitoproof 910 is a single component, moisture curing polyurethane liquid membrane designed for exposed and trafficable waterproofing applications. It forms a seamless, highly flexible waterproof barrier with excellent adhesion and UV resistance, making it ideal for balconies, podium decks, roof terraces and wet areas under tiles. Its Class III performance allows it to accommodate movement while delivering long term durability in external environments.

### KEY ADVANTAGES

- ✓ **Ready to use, straight from the can**  
Single-component system with no mixing and faster set-up.
- ✓ **Time-saving 2-coat system**  
Achieves required performance in two coats at a total 1.5 mm WFT, helping reduce labour time compared to traditional 3-coat systems.
- ✓ **Easy to apply**  
High build and consistent workability make it easier to achieve even coverage on horizontal surfaces like balconies and podiums.
- ✓ **Flexible and crack accommodating**  
Greater than 300 percent elongation helps manage slab movement and thermal stress, reducing call-backs.
- ✓ **UV resistant and foot trafficable**  
Suitable for exposed applications and light foot traffic without the immediate need for a top coat.
- ✓ **Standards compliant**  
Independently tested to AS/NZS 4654.1 and AS/NZS 4858 (Class III) for above-ground waterproofing and wet areas.

### APPLICATIONS\*

- Apartment balconies and terraces
- Podium decks
- Roof terraces and patios
- External walkways (non vehicular)
- Wet areas under tiles
