- Nitoflor PU200

THE PROJECT

Little Sky Gelato in Cheltenham, Victoria, recently expanded operations with the addition of a dedicated cold room for gelato production and storage. The project presented an opportunity to showcase the performance of the Nitoflor PU600/200 polyurethane cement flooring system within a demanding food-production environment. Hygiene, durability and long-term flooring performance were critical on this project.

THE SOLUTION

Operating within HACCP-sensitive conditions, the cold room required a flooring solution capable of delivering excellent cleanability, slip resistance and durability, while also curing reliably during installation in consistently low temperatures.

The Nitoflor PU600/PU200 system was specified because of its:

- ability to deliver a consistent, high-quality finish
- HACCP-certification, making it ideal for food production environments
- efficiency, minimising downtime within the cold room
- long term solution to minimise future down time for the client

The system was applied in two steps:

Step 1: Nitoflor PU600 was installed as the base system. A polyurethane cement floor topping, Nitoflor PU600 is designed to stand up to mechanical stress, chemical attack and extreme temperatures. It's ideal for circumstances where a fast turnaround is important. Nitoflor PU600 must be used with Nitoflor PU200.

Step 2: Nitoflor PU200 was applied to deliver a durable polyurethane flooring solution. Nitoflor PU200 is the ideal sealer coat for Nitoflor PU600. For additional slip resistance, aggregates were added.

Fosroc ANZ recently introduced a new bulk pack option for the Nitoflor PU600/200 system, to enable easier on-site batching and efficiency. Applicator feedback was very positive:

"The Nitoflor PU600/PU200 system performed well. It was easy to apply and had the correct flowability to level out without leaving imperfections."

Michael Bell, Director, Ascoat Commercial & Industrial Flooring

THE BENEFITS

- Reliable curing performance in cold environments
- Durable and hygienic polyurethane cement flooring system
- HACCP certified, non toxic flooring solution
- Excellent slip resistance and cleanability
- Easy to apply
- Smooth, uniform finish with low odour during installation
- Improved installation efficiency using new bulk pack configuration
